

Bioinformatics Scientist

We seek outstanding and motivated bioinformatics scientists to join the Skanderup research group at Genome Institute of Singapore (www.skandlab.org). The successful candidate will join a new team developing a web-based data analytics and visualization platform for cancer target discovery. The candidate must be motivated to learn new concepts from biology and cancer genomics. This is an excellent opportunity to gain experience in new emerging fields such as Precision Medicine and Big Data Analytics.

Requirements

1. Bachelor or Masters degree in Computer Science or related discipline with significant emphasis on software development and web technologies. Alternatively, a biological Bachelor or Masters degree supplemented by strong and documented programming skills.
2. Experience with web technologies is a major advantage.
3. Basic knowledge of biology and genomics is an advantage, but not a requirement.
4. Excellent written and spoken English

Interested candidates are invited to send a curriculum vitae to Anders Skanderup (skanderupamj@gis.a-star.edu.sg).
